

ART AND SCIENCE OF KNEE ARTHROPLASTY

CAPE - KOA
CENTRE FOR ACADEMIC AND PRACTICAL EXCELLENCE

**Under the aegis of Kerala Orthopaedic Association
34th CME and Bioskill Training in
the Art and Science of Knee Arthroplasty at the
Bio-skills Lab,
Sri Ramachandra Institute Of Higher Education & Research,
Chennai on Sunday 26th March 2023**

Dear Friends,

Total knee replacement is fast becoming one of the most commonly done orthopaedic procedures. It is now accepted as the most reliable method of alleviating pain and restoring motion for people suffering from osteoarthritis of the knee. Predictable results and patient satisfaction depend on the perfection of the surgery. Sound knowledge of biomechanics and precise execution in alignment and balancing are the essentials for success in Arthroplasty. Focused interaction with experts and hands-on cadaver training would go a long way to equip the young surgeon to master this surgery.

Cape-KOA is organising a cadaver workshop on Knee Arthroplasty to help the young surgeons to get a solid foundation and confidence in these techniques. We have arranged four cadaver stations and each station will cater to four delegates and would be supervised and supported by experts in the field.

The program will be held at the Bio-skills lab at SRMC Chennai on Sunday the 26th March. See you there
