ABOUT THE PROGRAM

TPAC 23
September 09th & 10th

The organising committee is pleased to invite you to TPAC '23, an advanced CME programme on Pelvic acetabular fractures to be held on 9th and 10th of September 2023 at Hotel SP Grand Days and Medical college Trivandrum.

The gracious and evergreen city spread over seven hills, Thiruvananthapuram, capital of Kerala, is steeped in history and culture. This is a city where time moves gracefully with the day unfolding according to time honored rhythms, qualities which make it one of the best cities in the country. Holding fort in the heart of the capital is Sri Padmanabha swamy Temple which is dedicated to Lord Vishnu who reclines on the serpent Anantha and after whom the city is named. Formerly called Trivandrum, the city's original name was restored in 1991.

Sp fort hospital is an undisputed name in the field of orthopaedics in Kerala for the past 25 years. With an exceptional team of doctors and other healthcare professionals, the organisation is expanding its wings to a 500 bedded hospital this year to serve the people of Trivandrum.

The Orthopedic Department at Trivandrum Medical College is staffed by a team of experienced orthopedic surgeons, residents, and supporting medical professionals. They strive to provide high-quality orthopedic care to patients, combining clinical expertise with advanced technology and evidence-based practices. The department also plays a role in teaching and research, which contributes to advances in the field of orthopedics.

The module includes didactic lectures, case discussion, a cadaveric workshop on approaches, and a saw bone model workshop, under the guidance of well experienced faculty members.

The Didactic lectures, Case Presentations, and Saw Bone Workshops will be held in SP Grand Days Hotel, while The Cadaveric workshop will be held at Department of Anatomy, Trivandrum Medical College.

FACULTIES
